

Abhishek Kumar

Bengaluru, India

abhik2603@gmail.com | + 91 8210962091

SUMMARY

Aspiring Data Engineer with strong expertise in SQL, Python, and PySpark, experienced in building scalable ETL pipelines and big data processing using Databricks and Delta Lake. Skilled in distributed computing, query optimization, and batch processing. Familiar with data modeling and real-world data engineering workflows.

SKILLS

Languages: Python, SQL, Java

Data Engineering: ETL Pipelines, Data Modeling, Data Transformation, Data Cleaning, Batch Processing, Data Warehousing

Big Data: Apache Spark, PySpark, Spark SQL, Databricks, Delta Lake

Streaming: Kafka (Basic), Structured Streaming

Databases: MySQL

Concepts: Distributed Computing, Query Optimization, OOPs, Data Structures

Tools: Git

PROJECTS

Databricks ETL Pipeline using PySpark

- Built scalable ETL pipelines using PySpark on Databricks to process large-scale datasets
- Implemented distributed data processing and optimized Spark transformations for performance
- Stored processed data in Delta Lake with efficient partitioning and schema management
- Applied query optimization techniques to improve processing speed and data retrieval

ETL Data Pipeline (CSV to MySQL)

- Developed an end-to-end ETL pipeline using Python and SQL for data extraction, transformation, and loading
- Performed data cleaning, normalization, and aggregation for analytics workflows

Sales Data Analysis Pipeline

- Built a data processing workflow using Python (Pandas) to analyze sales data
- Applied filtering, grouping, and aggregation to generate business insights

EXPERIENCE

Software Development Intern

Nov 2025 – Mar 2026

Kodnest Technologies, Bengaluru

- Worked on backend development using Java and MySQL with focus on SQL query optimization
- Improved structured data handling and system performance
- Collaborated with team members to deliver efficient backend solutions

AI DevOps Trainee

Sep 2024 – Feb 2025

Rooman Technologies, Bengaluru

- Gained experience with CI/CD pipelines and deployment workflows
- Monitored systems and resolved deployment issues in cloud environments
- Improved application reliability through debugging and monitoring

EDUCATION

Bachelor of Engineering (B.E.) – Information Science and Engineering

Atria Institute of Technology, Bengaluru

2025

CGPA: 7.0

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- AI DevOps Certification – Rooman Technologies
